INTERNATIONAL SEARCH REPORT

International application No. PCT/US2004/022579

| Box II | Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet) |
|------------|--|
| This Inter | national Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: |
| 1. X | 57-58 Decause they relate to assign the factor of required to be searched by this Authority, namely: Rule 39.1(iv) PCT - Method for treatment of the human or animal body by surgery |
| | Claims Nos.: because they relate to parts of the internetional Application that do not comply with the prescribed requirements to such an extent that no meaningful internetional Search can be cerried out, specifically: |
| 3. | Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Fule 6.4(a). |
| Box III | Observations where unity of invention is lacking (Continuation of item 3 of first sheet) |
| This Inte | rnational Searching Authority found multiple inventions in this international application, as follows: |
| | see additional sheet |
| 1. | As all required additional search fees were timely paid by the applicant, this international Search Report covers all searchable claims. |
| 2. | As all searchable claims could be searched without effort justifying an additional ises, this Authority did not invite payment of any additional fee. |
| 3. | As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Ros.: |
| 4. X | No required additional search fees were timely paid by the applicant. Consequently, this international Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-17, 35-56 |
| Remai | The additional search fees were accompanied by the applicant's profest. No protest accompanied the payment of additional search fees. |

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-17,35-56

A safety needle assembly with a needle, a body attached to the needle, a base attached to the body, wherein movement of the needle between an insertion position and a protection position creates a positive flush through the distal end of the needle.

2. claims: 18-34

A needle device with a needle, a housing with an upper and a lower portion, said upper portion being graspable to facilitate positioning of the needle device, and a collapsible reservoir between the upper and the lower portion.
